

# Corpus Christi Bay

**50% threshold  
n stations = 81**

-  Tessellated Hexagons - 500 m edge
-  Seagrass (Continuous SRV)

Hexagons were tessellated over the entire extent of the seagrass beds, classified as "Continuous SRV" in the NOAA Benthic Habitat Mapping. A 'minimum seagrass coverage' threshold was applied within each hexagon to prioritize monitoring activities. The threshold applied (as minimum percent of seagrass within each hexagon) and the resulting number of stations are identified on each map.
