

# Matagorda Bay

**33% threshold  
n stations = 50**

 **Sampling Hexagon, 500-m edge**

 **Seagrass**

Hexagons were tessellated over the entire extent of the seagrass beds identified in a seagrass coverage dataset provided by TPWD. A 'minimum seagrass coverage' threshold was applied within each hexagon to prioritize monitoring activities. The threshold applied (as minimum percent of seagrass within each hexagon) and the resulting number of stations are identified on each map.
